PES(DIE)

- Gordon (1994). Nursing Diagnosis: Process and Application, 3ed. Mosby, St Louis.
- Geraadpleegd juni 2017 via: <http://kb.nanda.org/article/AA-00269/0/Our-hospital-requires-us-to-use-the-PES-format-scheme.-How-was-PES-developed-and-what-are-its-origins.html>: "PES" is an acronym that stands for Problem, Etiology (related factors) and Signs/Symptoms (defining characteristics). The PES format was first published by Dr. Marjory Gordon, a founder and former President of NANDA-I. The component parts of NANDA-I diagnoses are now referred to as related factors and defining characteristics, and therefore the wording "PES format" is not used in current NANDA-I books. However, it is still used in several countries and in many publications.
